Read what it says.
You will need an eLicenser usb dongle from Steinberg.
Did anyone find out if it works with the dongle?

It does install but suspiciously fast. There is no OUR eLC software package just what it seems the original eLC. Keygen opens a command prompt window searching for the attached "clean" USB key. Although mine is in place and brand new bought it especially for this after a few seconds the command prompt window closes unexpectedly without doing anything! Shame
